👤 Executive Summary

A seasoned technology leader and enterprise systems architect with over **22 years of experience** in Iraq's sovereign government sector. Since 2022, he has directed the IT Department of the General Secretariat of the Council of Ministers, overseeing the nation's core digital infrastructure and comprehensive automation initiatives. As a **Full-Stack Architect**, he has deep expertise in designing and building large-scale systems and sensitive database platforms. His career is highlighted by the successful launch of landmark strategic platforms — including the Iraqi Government E-Mail System and the Council of Ministers Agenda Management System — and is crowned by multiple high-level Letters of Appreciation from **three successive Iraqi Prime Ministers**.

CAREER & PROFESSIONAL EXPERIENCE

2022 – Present

Director of IT Department (IT Director)

General Secretariat of the Council of Ministers – Republic of Iraq

Leading the digital strategy and electronic transformation of the General Secretariat, managing software development teams, cloud infrastructure, and database administration, while ensuring the continuity and security of inter-governmental digital services at the national level.

2016 – 2022

Head of Software Development Division

IT Department – General Secretariat of the Council of Ministers

Managed the full software development lifecycle (SDLC), directly supervised the programming and engineering of sovereign systems, and established software governance standards and API integrations with ministries and independent bodies.

2008 – 2016

Systems Developer & Lead Programmer

IT Department – General Secretariat of the Council of Ministers

Designed and programmed complex relational database systems, developed internal and external applications for the General Secretariat, and automated administrative and financial procedures while managing and securing electronic content.

2006 – 2008

Systems & Digital Communications Officer

Department of Media and Government Communications – General Secretariat

Managed and developed government media publishing platforms, and built conference databases, news broadcast systems, and archiving of official governmental communications.

2004 – 2006

Programmer & IT Officer

Ministry of State for Women's Affairs

Established the initial digital infrastructure core of the Ministry, building statistical databases and administrative systems for human resources and field programs.

KEY STRATEGIC PROJECTS & SYSTEMS DELIVERED

Iraqi Government E-Mail System

The unified national platform for official correspondence between the Prime Minister's Office, ministries, and governorates — secured with the highest encryption standards.

Council of Ministers Agenda System

The electronic system for managing decisions, agendas, and deliberations of Cabinet sessions, enabling digital and confidential circulation of ministerial memos.

Kurdistan Region Representation System

A coordination and direct digital communication platform for managing shared issues and official correspondence between the Federal Government and the Region.

Iraqi Companies System (Public & Private)

A comprehensive database and archiving system for tracking the status of companies and investment projects across Iraq.

Sovereign Documents Archiving System

An enterprise archiving system for managing, preserving, and retrieving millions of documents, Diwan orders, and meeting minutes electronically.

Official Secretariat General Portal

Development and launch of the central e-portal with advanced security levels to deliver news, services, and official data to institutions and the public.

LETTERS OF APPRECIATION (OFFICE OF THE PRIME MINISTER)

H.E. Prime Minister – Eng. Mohammed Shia' Al-Sudani

Letters of appreciation in recognition of outstanding achievements in digital transformation programs and the successful deployment of vital government e-systems.

H.E. Prime Minister – Mr. Mustafa Al-Kadhimi

Letters of appreciation for exceptional efforts in automating Council of Ministers sessions and securing governmental communication and e-mail channels.

H.E. Prime Minister – Dr. Adel Abdul-Mahdi

Letters of appreciation for direct oversight and the launch of qualitative software platforms and the archiving of government documents and data.

EDUCATION & ACADEMIC DEGREE

Bachelor of Computer Science

University of Baghdad – College of Science

Graduation Year: 2001

Professional Grade: Senior Chief Programmer

TECHNICAL & ENGINEERING SKILLS

DATABASES

Microsoft SQL Server
